

ENGINEERING

DUAL DEGREE PROGRAM

INFORMATION SESSION

led by

Elizabeth Halper, '14

Lizzie is a Kenyon College alumnus who has completed the Engineering Dual Degree Program with Washington University in St. Louis. On Monday, August 29, she is revisiting her first alma mater to talk about the program. She was a math major at Kenyon and a computer science major at Washington University. She can speak to whether or not this path is right for students based on their interests in different engineering disciplines. She will touch on the different possible paths to an engineering program, which incorporates class prerequisites as well as ideas for helpful summer experiences. Lastly, she plans on discussing life as a whole at Wash U including professors, living off campus, and the social atmosphere. Both students and teachers of all majors are encouraged to attend (and ask a lot of questions)!

Monday, August 29, 2016
3:10 p.m.
Hayes 211/213
