Student projects exploring the use of metaphoric imagery in computer user interfaces.

Friends have obstacles in their lives. They help each other.

Student teams have worked to create interactive multi-user web-based interactions to provide users with a metaphoric/artistic experience while engaging in game play and/or collaboration.

These presentations are open to the public display and presentation. Attendees are invited to bring their laptops/phones/tablets so they can engage in actually using these platforms.

Thursday, May 10, 2018
9:00 am - 10:30 am
Community Foundation Theater
Open to the public
