

THE SOCIAL NETWORK

(WITH ACTUAL PEOPLE)

Presented by

**The Career Development Office
and the Department of Physics**

Introduction by

Lee Schott

Associate Director, Career Development Office

The Physics Department and Career Development Office are teaming up to host a fun, informal networking event. Networking is an important life skill, but it can be a tough one to master because of limited opportunities to practice it. This event will be a no-pressure environment for you and your physics peers to practice it with Kenyon staff from different departments! All attendees will receive a BINGO card that can be completed by meeting people and learning about their careers and professional goals: completed cards are entered for raffle drawings at the end of the event!

Come get some great advice, practice networking, have lunch and have fun.

FRIDAY, JANUARY 25 - 12:10 - 1:00

Franklin Miller, Jr. Lecture Hall - Hayes 211/213

Lunch will be served from 11:50 a.m. to 12:10 pm

PHYSICS COLLOQUIUM SERIES - SPRING 2019
