SUPEREXPONENTIATION

We will consider the expression $x^{x^{x^{\dots}}}$ to see if it makes sense. We will examine the values x for which this makes sense. A dynamical systems approach will be taken in solving this problem. No prior knowledge of dynamical systems is required and the talk should be accessible to anyone with Calculus I knowledge.

APRIL 8, 2019, AT 3:10 PM

Franklin Miller, Jr. Lecture Hall - RBH 109

MATH MONDAY
