

STUDENT POSTER SESSION

PHYSICS DEPARTMENT

RESEARCH IN PHYSICS

Friday, May 3, 2019

12:10 - 1:00

In the spring semester, several students (~20) majoring in physics pursued independent research projects with a faculty advisor. The research topics spanned a wide range, including astronomy, cosmology, quantum information theory, gravitational waves, atomic physics, and condensed matter physics. These students will present their work at a poster session during the regular departmental colloquium hour.

Hayes Hall 211/213

Lunch will be provided from 11:50 to 12:10.
